SUMMARY

Computer Science student with a 3.76 GPA and hands-on experience in full-stack development, automation, and cloud technologies. At Qualtrics, replaced manual workflows with Python-based automation that improved accuracy, speed, and reliability across large-scale data operations. Passionate about building practical, user-focused software using modern web frameworks and AI-driven tools.

EDUCATION

SUNY Old Westbury <i>Bachelor of Science in Computer Science</i> • GPA: 3.76 • Dean's List: Fall 2023, Fall 2024, Spring 2025, Fall 2025 • Relevant Coursework: Data Structures & Algorithms, Computer Architecture, Database Systems, Software Engineering, Linear Algebra, Internet & Web Technology, Probability & Statistics	Old Westbury, NY <i>Expected May 2027</i>
---	--

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, C++, Python, SQL, HTML/CSS, PHP, Go
Frameworks & Libraries: React, Node.js, Spring Boot, Express.js, Tailwind CSS
Databases & Cloud: MySQL, MongoDB, Supabase, AWS, Google Cloud Platform
Developer Tools: Git, Docker
Certifications: Google Cloud Fundamentals (Issued Jul 2025), Intro to Technical Interview Prep (Issued Apr 2026)

EXPERIENCE

Qualtrics <i>Data Optimizer</i> • Automated mobile campaign data validation using Python, achieving 100% accuracy and removing manual bottlenecks. • Built audit tools that identified and corrected 50+ technical errors per month, ensuring reliable digital rollouts for enterprise clients. • Increased task processing speed by 25% by developing a script-driven system to verify 100+ concurrent data tasks.	New York City, NY <i>Jul 2025 – Dec 2025</i>
--	---

PROJECTS

CI/CD Viz <i>React, Spring Boot, Supabase, GitHub Actions</i> • Built a deployment monitoring dashboard that tracks CI/CD health and sends real-time alerts for failing updates. • Integrated GitHub Actions with a REST API, enabling teams to detect and resolve delivery issues 60% faster.	Sep 2025 – Nov 2025
Rate My Major <i>Python, React, PostgreSQL, OpenAI</i> • Developed an AI-powered platform that analyzes 12+ academic majors to provide salary insights and industry trends. • Designed a Python backend and relational database storing 15+ attributes per major, enabling fast and structured data retrieval.	Nov 2025 – Dec 2025
AI Maze Simulation <i>JavaScript, React, OpenAI</i> • Created an interactive maze game that uses AI to deliver dynamic, context-aware hints based on player movement. • Built a visualization dashboard that predicts player success patterns with 85% accuracy.	Mar 2025 – May 2025

ACTIVITIES

Business & Computer Club <i>Web Developer</i> • Led development of the club's official website, establishing a modern and professional online presence.	Feb 2025 – May 2025
Coding Club <i>Member</i> • Participated in weekly algorithmic problem-solving sessions with 10+ peers to strengthen coding fundamentals.	Sep 2023 – Present
